

BTC | XRP | DSH | LTC | BCH | ETH | EOS | XMR | MBT

You have opened a position of 4 lots BTCUSD at the price of 21,000 USD.

**Total Volume:**

$$4 \text{ Lots} \times 1 \text{ (contract size)} \times 21,000 \text{ (opening price)} = 84,000 \text{ USD}$$

In this case, the aggregate notional USD value of open positions on BTCUSD is greater than 10,000 USD but less or equal to 100,000 USD which falls within Tier 1, 2, and 3, therefore, leverage of 1:500 is provided for the first 10,000 USD, leverage of 1:200 is provided for the next 40,000 USD, and leverage of 1:100 is provided for the remaining 34,000 USD.

CALCULATIONS:

$$10,000 \times 1/500 = 20 \text{ USD}$$

$$40,000 \times 1/200 = 200 \text{ USD}$$

$$34,000 \times 1/100 = 340 \text{ USD}$$

$$\text{Margin requirement} = 560 \text{ USD}$$

$$\text{Account currency is BTC, therefore } 560 / 21,000 \text{ (BTCUSD price)}$$

$$\text{Margin requirement} = 0.026667 \text{ BTC}$$
